linkedin.com/in/ashokkumarboya github.com/ashokkumarboya93 Portfolio

Professional Summary

Motivated Computer Science undergraduate with strong hands-on experience in Python development, machine learning, and backend web applications. Proficient in building REST APIs, data-driven systems, and predictive models using Python and Java. Completed multiple real-world projects and internships focused on analytics, AI, and automation. Seeking an entry-level Python or AI-focused role where strong problem-solving and practical development skills can be applied.

Technical Skills

- **Languages:** Python, Java, SQL
- **Python Technologies:** Flask, REST APIs, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, OpenCV
- **Java Concepts:** Core Java, OOP, Collections Framework, Exception Handling
- **Databases:** PostgreSQL, MySQL, Supabase
- **Tools:** Git, GitHub, AWS (EC2, S3), VS Code, Modern AI Tools, Streamlit

Projects

EduMetric — Student Performance Analytics System

[Link](#)

- Developed a full-stack Python web application analyzing 10,000+ student records with predictive analytics.
- Implemented REST APIs and dashboards that reduced academic reporting time by 70%.

Deep-Vision — Crowd Monitoring System

[Link](#)

- Built a real-time computer vision system using PyTorch and OpenCV processing video streams at 15–20 FPS.
- Integrated Flask backend APIs and Streamlit dashboards for live monitoring.

Employee Salary Prediction

[Link](#)

- Created an end-to-end regression pipeline using Scikit-learn achieving an R^2 score of 0.89.
- Deployed a Flask-based prediction API with validation for real-time inference.

Work Experience

AI/ML Intern — Infosys Springboard

Jun 2025 – Aug 2025

- Developed and optimized machine learning models using Python, improving prediction accuracy through feature tuning.
- Built automated preprocessing pipelines handling large-scale datasets efficiently.

AI Intern — AICTE IBM Edunet

May 2025 – Jul 2025

- Implemented regression models with improved prediction stability using hyperparameter tuning techniques.
- Performed dataset preparation, missing value handling, and workflow optimization using Python.

Education

St. Johns College of Engineering and Technology

Sep 2022 – May 2026

B.Tech in Computer Science and Artificial Intelligence

CGPA: 8.0/10

Deeksha Junior College, Yemmiganur

Aug 2020 – Sep 2022

Intermediate (MPC)

Percentage: 77.8%

Certifications

- IBM SkillsBuild — Data & AI Fundamentals
- Oracle — AI Vector Search Professional
- Cisco — Data Analytics
